Welcome Friends,

We are excited to invite you to the Black Crest Farm Annual Spring Production Sale on February 9, 2019. We have been raising Angus cattle for over 60 years. We think you will agree the genetics and performance of this sale offering are superior. We've been performance testing bulls for decades and take great pride in our program and the performance information that we can share with you. We use the most popular, up-to-date AI sires as well as select top-quality, young natural service sires from today's leading breeders. The progeny of these fine sires emphasizes calving ease, growth, carcass performance and strong maternal traits. Our AI and embryo transfer programs have allowed us to produce cattle that will benefit both our purebred and commercial customers. Half of the bulls have double digit calving ease and/or low birth weight EPD's.

The females selling are top performers. This is the most consistent group of cows we have ever offered for sale. The first group of cows will sell with winter-born calves at side. The second group of cows will be bred to our herd sire KCF Bennett Beef Bank C765 for fall-2019 calves.

The sale starts at noon. Lunch will be served about an hour before sale time. The sale offering will be available for viewing on Friday afternoon February 8 and the morning of February 9 before the sale. If you would like to stop by earlier to have a look, our door is always open and you are always welcome. The cattle will be available to load after the sale or we will be glad to assist you in delivery arrangements. If we can assist you in any manner, please call Jon at 803-983-1202 or Billy at 803-491-6798.

Sincerely,

Billy, Mark & Ricky McLeod and Melissa Bradshaw – Owners

Jon Ripstein – Cattle Manager

Marion Harriott – Assistant Cattle Manager

Ray Wadford - Assistant

Black Crest Farm's Breeding Guarantee

1. The seller guarantees that all animals are breeders, with the exception of: (a) calves under 12 months of age at the time of the sale; (b) animals shown after the sale has occurred (in such cases, the breeding guarantees, if any, will be those guarantees as are agreed upon between the seller and the buyer); (c) animals who suffer injury or disease following the sale; and (d) animals subjected to gross negligence by or willful misconduct on the part of the buyer.
2. **The seller guarantees that all bulls are breeders for a period of 90 days following the initial turn out with buyer's herd, but only if such bulls are at least 12 months old at the time of sale and have not been allowed to run with the herd until at least 14 months of age. A bull that settles a cow by natural service and passes a fertility test performed by a competent veterinarian or reproductive technician mutually agreed upon by the buyer and the seller will be considered a breeder.** Unless otherwise agreed by the buyer and the seller, the seller makes no guarantees with respect to the ability to freeze semen.
3. **Cows with calves at their side are presumed to be breeders with no further fertility guarantee.**
4. **"Safe-in-calf" females are guaranteed by the seller to have been examined by a competent veterinarian or reproductive technician and determined to be safe-in-calf by examination or other proven method (e.g., ultrasound, pregnancy blood tests, and rectal palpation).**
5. **"Served" females are not guaranteed to be in calf.**
6. **"Pasture-bred" females have been exposed but are not guaranteed to be in calf.**
7. **"Open" females are guaranteed by the seller to be without calf.**

All bulls need proper nutrition prior to, during and after the breeding season, so they can maintain strength and condition plus grow out properly. Observe bulls closely and make sure they are serving and settling cows. We recommend that you not allow them to get too thin at any time. If you are concerned, please contact us immediately, so we can help insure your success.

The number of cows a young bull is exposed to should be governed by his age at the start of the breeding season.

Bull's Age
