Welcome Friends,

We are excited to invite you to the Black Crest Farm Annual Spring Production Sale on February 11, 2017. We have been raising Angus cattle for over 50 years. We think you will agree the genetics and performance of this sale offering are superior. We've been performance testing bulls for decades and take great pride in our program and the performance information that we can share with you. We use the most popular, up-to-date AI sires as well as select top-quality, young natural service sires from today's leading breeders. The progeny of these fine sires emphasizes calving ease, growth, carcass performance and strong maternal traits. Our AI and embryo transfer programs have allowed us to produce cattle that will benefit both our purebred and commercial customers.

The females selling are top performing females. Many of the cows sell with fall-born calves at side. The remainder will have winter or early spring calves. They will be bred to top AI sires as well as our own sires. Just last year we purchased two Abigale cows to further enhance the genetic improvement of our herd.

The sale starts at noon. Lunch will be served about an hour before sale time. The sale offering will be available for viewing on Friday afternoon February 10 and the morning of February 11 before the sale. If you would like to stop by earlier to have a look, our door is always open and you are always welcome. The cattle will be available to load after the sale or we will be glad to assist you in delivery arrangements. If we can assist you in any manner, please call Joey at 601-299-1552 or Billy at 803-491-6798.

Sincerely,

Billy, Mark & Ricky McLeod and Melissa Bradshaw – Owners

Joey Smith – Cattle Manager

Marion Harriott – Assistant Cattle Manager

Black Crest Farms' Bull Breeding Guarantee

Black Crest Farms guarantees that all bulls sold in this sale have passed a complete breeding soundness exam performed by a qualified person, are fertile and should breed cows to the best of our knowledge.

All bulls need proper nutrition prior to, during and after the breeding season, so they can maintain strength and condition plus grow out properly. Observe bulls closely and make sure they are serving and settling cows. We recommend that you not allow them to get too thin at any time. If you are concerned, please contact us immediately, so we can help insure your success.

The number of cows a young bull is exposed to should be governed by his age at the start of the breeding season.

Bull's Age

15 months – 15 cows
18 months – 18 cows
24 months – 24 cows
